

Yale University PET Center Service Prices July 1, 2016 – June 30, 2017

The PET Center is an ISP (Internal Service Provider). Each fiscal year (FY), we set our prices for PET services based on our scan volume and based on our costs (personnel, supplies, maintenance contracts, etc.)

PET Center FY17 prices* are as follows. Prices have increased by ~ 3%.

Item	Price
PET Scan for Human or Large Animal (up to 2 hours of scanning)	\$2160
Rodent imaging per hour	\$ 540
Additional scan for Human or Large Animal hour	\$ 540
Radiosynthesis	\$1960
Blood metabolites / Arterial Line	\$ 810

Thus, a 2-hour C-11 scan with metabolites costs $\$2160 + 1960 + 810 = \4930 .

Note that it is very important to provide charging instructions in advance of the first scan.

Please refer questions on PET pricing to Tara Zalatimo (tara.zalatimo@yale.edu)

Non-human primate charge: \$1850 per day of use

Ligand development: \$22,850

Pharmacokinetic study: \$2300
