

## Yale University PET Center Service Prices July 1, 2017 – June 30, 2018

The PET Center is an ISP (Internal Service Provider). Each fiscal year (FY), we set our prices for PET services based on our scan volume and based on our costs (personnel, supplies, maintenance contracts, etc.)

PET Center FY18 prices\* are as follows. Prices have increased by ~ 2-7%.

Item	Price
PET Scan for Human or Large Animal (up to 2 hours of scanning)	\$2250
Rodent imaging per hour	\$ 560
Additional scan for Human or Large Animal hour	\$ 560
Radiosynthesis	\$2100
Blood metabolites / Arterial Line	\$ 825

Thus, a 2-hour C-11 scan with metabolites costs  $\$2250 + 2100 + 825 = \$5175$ .

Note that it is very important to provide charging instructions in advance of the first scan.

*Please refer questions on PET pricing to Tara Zalatimo (tara.zalatimo@yale.edu)*

Non-human primate charge: \$1910 per day of use

Ligand development: \$23,540

Pharmacokinetic study: \$2370
